Dear Pyramid Team

Herewith I would like to thank you all for your continuous support over the years. Our service and operation teams have always been amazed with Pyramid's design approach of "embedded versatility" and modularity, which allowed us to feel confident in the ever-changing, evolving world of ASICs and MCM packaging.

We always used this versatility of Pyramid systems and configured them from the immense list of options; akin to the best restaurant's menu, and sometimes managed to combine totally different applications and process steps in a single kit, which was quite a unique proposition in the world of purpose-built machinery.

Over the years Pyramid systems remain an indispensable backbone for many challenging projects we are part of. I appreciate the fact that for a specialist manufacturer with a half-century track record, staying on top of the industry's cutting-edge applications is a no mean feat. Pyramid is obviously, not slowing down their pace: the release of new generation of laser and seam sealing systems in 2020, along with opening a brand new production site near London proved Pyramid's strong commitment to many more years of success ahead.

Best Regards,

Sergei Valev
Director
